Specialist program taught in English

General Medicine

The Institute of Medicine and Psychology of V. Zelman, NSU prepares specialists in the field of “General Medicine”.

Thanks to the university research base, students receive not only a full-fledged medical, but also a holistic science education.

The mission of the program is to train highly qualified research doctors who undergo extensive clinical practice, possess natural science knowledge and have the skills of experimenters, which allows them to build career in both practical medicine and science.

Duration of study – 6 years
Tuition fee – \$6,500 per year

Preparatory courses - Medicine

Duration – 8 months

1st November – 31st July

Language of instruction - English

- Physics
- Chemistry
- Biology
- Mathematics
- Russian language

Tuition fee – 4500 \$

Application fee – 130 \$

Residency training taught in English

Dermatovenerology

A Residency in Dermatovenerology is designed to prepare qualified, trained medical specialists in dermatology. They will be able to work in a specialized area of medicine, including high-technology medical care.

The education will provide trainees with a broad background in fundamental medical science and with the professional, technical and clinical skills in the field of dermatovenerology.

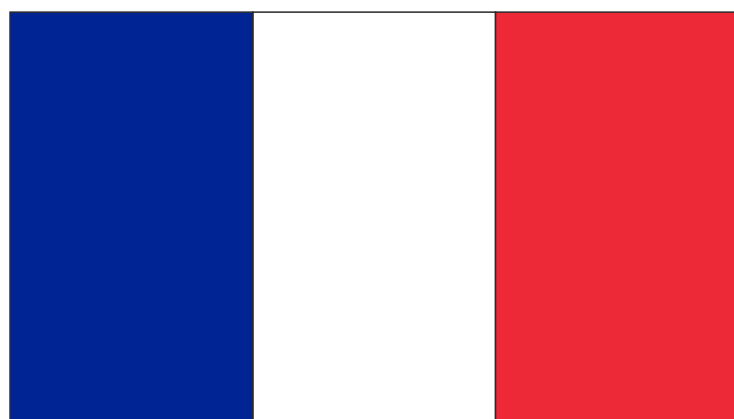

During their clinical practice, residents learn to work with dermatological and venereal patients and patients with skin neoplasms.

Residents are trained in the basics of non-invasive (dermatoscopy, skin ultrasound, mexametry, corneometry) and invasive dermatovenerology research methods.

Duration of study – 2 academic years

Language of instruction – English

Tuition fee – \$10,000 per year

International double degree master's programs

NSU offers several double degree Master's programs with leading universities in France, the CIS and the Shanghai Cooperation Organization.

Most programs require 2 years of study, with the student enrolled for one year at NSU and the other in a partner university.

Students from partner universities can participate in the programs. The languages of instruction are English and/or Russian.
